Specification of the course for the Book of courses

Study program		Applied statistics	
Title of the course		Statistical software I	
Teachers (for lectures)			
Teacher/fellow teacher (for exercises)		Bojana Milošević, Đorđe Kadijević	
ESPB	6	**Status of the course (obligatory (O) /elective (E))**	O

Conditions	
Aim of the course	The aim of the course is to introduce student to statistical software work and enivironment
Course outcomes	Student will be able to use statistical software for statistical analyses. Student will understand data frames in order to perform statisitcal analysis. Student will get familiar with various software environments (R, PSPP, EXCEL, SPSS, Statistica, ...)
Content of the course	
Theoretical classes	
Practical classes	Data input and manipulation in different software. Application of the material form the course Statistics I.
