

Subject: Review of Lifelong Learning Programme in Applied Statistics.

The proposal of the Master in Applied Statistics organized under the aegis of the University of Novi Sad, were organized according to European standards so that we can provide learners with the skills necessary to operate in different fields where statistics plays an important role. The courses are organized at the Faculty of Sport and Physical Education. The courses that are currently active are 12 and are held in English language. The credits' number assigned to the courses are of 2 or 3 credits (ECTS). The programs are coherent with the course objectives. The bibliography of each course is clearly indicated and is formed by English language books published by prestigious worldwide publishing houses. The indication of who can take part in courses, prerequisites and procedures for conduct of examinations, are clearly stated. On the basis of the above considerations, it is estimated extremely positive the organized program of the courses in Applied Statistics.
